

Product Name: Cyan

Type of Treatment: seed priming

Crop(s): red beet

Category: eco-friendly, conventional

Benefits (as measured, soil test):

Time to emergence: 2-3 days faster

Vigour: +13%

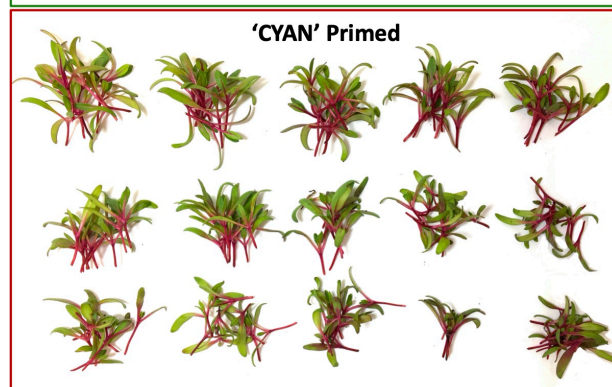

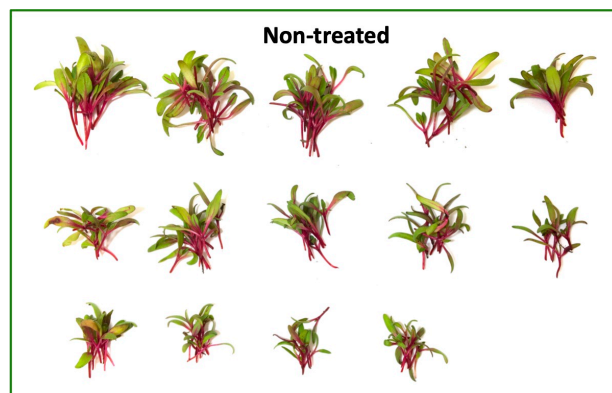

Usable Plants: +24%

Total Germination: +7%

Biomass build-up: +39%

Notes:

The main feature of Cyan is its ability to elevate speed of germination and to achieve much higher uniformity than non-treated seed.

Use conditions:

Seed storability: seed must be kept at low temperature (<15°C) and low relative humidity (<30-35%) after treatment in order to maintain seed viability, since this treatment shortens its life-span.
