

Product Name: Ebony

Type of Treatment: seed priming

Crop(s): eggplant

Category: eco-friendly, conventional

Benefits (as measured, soil test):

Time to emergence: >7 days faster

Vigour: +58%

Usable Plants: +12%

Total Germination: +12%

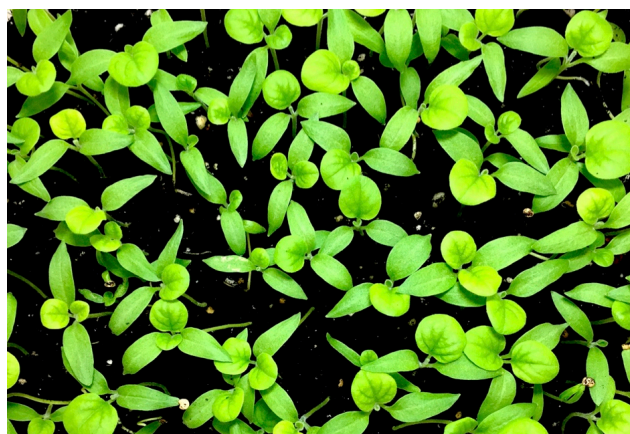

Biomass build-up: +69%

Notes:

This treatment strongly breaks seed dormancy, allowing an early and very fast seedling emergence and biomass build-up.

Non-treated

Primed ('Ebony')

Use conditions:

Seed storability: seed must be kept at low temperature (<15°C) and low relative humidity (<30-35%) after treatment in order to maintain seed viability, since this treatment shortens its life-span.
