

Product Name: Aztec

Type of Treatment: seed priming

Crop(s): corn

Category: eco-friendly, conventional

Benefits (as measured, soil test):

Time to emergence: 2-4 days faster

Vigour: +53-58%

Usable Plants: up to +24%

Total Germination: equal

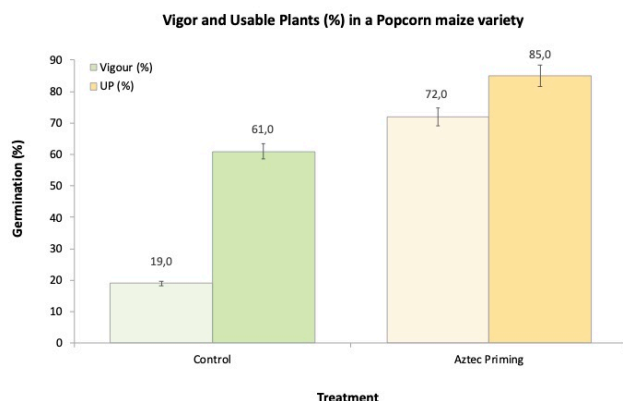

Biomass build-up: +18-24%

Non-treated

Summary:

Aztec works in many different types of corn varieties, accelerating growth and increasing seedling vigour.

Primed ('Aztec')

Use conditions:

Seed storability: seed must be kept at low temperature (<15°C) and low relative humidity (<30-35%) after treatment in order to maintain seed viability, since this treatment shortens its life-span.
